Proposal

Titus Core

2019-03-27

hello@tituscoin.com

www.tituscoin.com

Background

The whitepaper states that the Titus Exchange will be allocated 100,000,000 TTS of the premixed Titus Coin. Page 44 of the latest version of the whitepaper states that the Titus Exchange will be called Payens (www.payens.io), and will be used for the buying and selling of Titus Coin as well as other cryptocurrencies. The latest version of the whitepaper is version 1.05 as of the writing of this proposal.

As of today, the proposed Titus Exchange called Payens (www.payens.io) has not yet opened. The 100,000,000 coins for the Titus Exchange have not yet been claimed, and are currently being held in cold storage. In the meantime, another website has opened that allows buying and selling of cryptocurrencies, including Titus Coin, called Novapago (www.novapago.com).

Proposal

To further the spread of Titus Coin and to increase the ease with which everyday transactions can be done with Titus Coin, we propose to amend the whitepaper definition of Titus Exchange to instead refer to Novapago (www.novapago.com) and that the allocation of 100,000,000 TTS be made available to Novapago.

Approval process

Due to the large amount of coins involved, this proposal will be put up to a community vote using the blockchain. A funding proposal for 5 TTS will be made on the blockchain, which directs to this proposal. The success or failure of that funding proposal will be taken as approval or disapproval of this proposal. Anyone running a Titus Coin TitusNode will be eligible to vote.
